CATALOGUE

— OF —

Fruit Trees, Roses, Forest Trees and Seeds.

Box 9,
Stutterheim,
Cape Province.

Terms and Conditions for the Sale of Trees, Plants, Seeds. etc:—

All goods are true to name as far as it is possible to have them.

Risk of every description must be borne by the purchaser immediately goods have left our Nursery, every care being taken in the packing, labelling, and forwarding.

All orders are carefully labelled and securely packed in the best manner.

Add exchange and cross all cheques.

Terms cash with order, and where cash does not accompany order, goods will be forwarded C.O.D. except by special arrangement.

With all orders please send second choice and say if we may substitute in case both are sold out.

Unless instructed otherwise we take the liberty of substituting. Where selection of trees is left to us, trees will be selected that cannot fail to give satisfaction.

NON-WARRANTY.

The best seeds and plants will occasionally fail from causes entirely beyond human control, and although we take great pains to supply them **New, Genuine** and **Unadulterated** thereby reducing the chances or errors to almost an impossibility, we wish it to be distinctly understood that every order we receive for seeds or plants named in this Catalogue will be executed only on the following conditions. **Sidney Myers gives** no warranty, express or implied, as to description, quality, productiveness, or any other matter of any goods he may send out, and he will not in any way be responsible for the crop.

SIDNEY MYERS.

ROSES established in tins, 2/6 each.

FRUIT TREES.

I have an excellent stock of well grown Fruit Trees.

The season for planting Fruit Trees commences in June, and continues until the end of August. Small trees may be forwarded per Parcel Post to any Post Office in the Union of South Africa. The Postage on 12 Small Trees will average 1/-

All Fruit Trees Packed Free for Cash with Order.

ALMONDS.

On Seedling Peach Stocks.

All varieties of Almonds should be planted alternate rows of each sort as they need thorough cross fertilisation.

Prices 1s. 6d., 3s. 6d. each. £5 to £7 10s. per 100.

A very fine lot of Extra Strong Trees. These will come into bearing very quickly.

Grosse Tendre.—A new almond, very large, thin shelled, good grower and heavy bearer.
Imperial—Good grower, large size fruit, excellent in every way.

I.X.L.—Strong upright grower, large nuts, soft shell

Jordan.—The most celebrated almond of commerce, and far and away the largest. One of the later importations, which should be tried by everybody who wants to grow Almonds.

Nonpareil.—A very fine almond, large kernel, and very thin shell. The shell of this Almond is the thinnest we know of, thus losing very little weight after being shelled.

Paper Shell.—Medium size, soft shell nut of good quality, and bears well

Princess.—Willowy habit; soft shell.

APPLES.

Prices 1s. 6d. to 3s. 6d. each. £5 10s. to £7 10s. per 100.

On Northern Spy and Sweet Apple Stock.

Blenheim Orange.—Large yellowish streaked with red on sunny side. Table and cooking. March.

Cliff's Seedling.—Fruit large, highly coloured, crisp, juicy, exquisite flavour; a late keeper; perfectly blight proof.

Delicious.—A most beautiful apple from Iowa. Tree a strong grower, hardy and most prolific bearer; fine colour like "Jonathan," and most exquisite flavour. One of the best keeping apples.

Grimes Golden—A golden-yellow apple that for nearly a century has been prized by American apple lovers because of its quality and beauty. It has a firmly established place on the market, and always commands top prices. Its distinctive colouring makes it an easily recognised sort. The tree is a hardy, vigorous grower, a late bloomer and a young bearer; should be largely planted.

Ohenimuri Apple. Excellent keeper. One of the most Popular.

APPLES.—(Continued.)

Irish Peach.—Yellow, streaked red, excellent quality, heavy cropper. January – Feb.

Missouri Pippin.—Large; pale whitish yellow, splashed with light and dark red; flesh whitish; crisp, moderately juicy; sub-acid. Can be recommended. March—September. Stores well. Suitable for export.

Nickajack—Fruit large round, colour yellowish, striped and splashed with two shades of red. Flesh yellowish, compact, moderately tender and juicy, ripening late and keeping well. The value of this variety is chiefly on account of its extreme hardiness and productiveness.

Norfolk Beefing.—Medium size, dark red apple, good keeper; heavy, regular cropper. Quite first-rate.

Ohenimuri.—Australian apple of great excellence, hardy grower, good bearer, fruit above medium size, bright yellow, excellent keeper. April and later.

Reinette du Canada.—A large and handsome culinary and dessert apple. Skin greenish yellow, brownish on sunny side, covered with numerous brown russety dots. Highly esteemed in Australia.

Rome Beauty.—Winter dessert apple, late bloomer, fruit large, with carmine stripes April—June.

Sharp's Early.—Fruit of medium size, handsome appearance, yellow, covered with red stripes. A heavy cropper and perfectly blight proof.

Versfeld's.—Well known late apple. Large red streaked, sometimes quite red, nearly blight proof. From May.

White Winter Pearmaine.—Finest dessert apple in cultivation, large yellowish, rosy cheek, keeps well.

APRICOTS.

On Peach Stocks.

Prices 1s. 6d. to 3s. 6d. £5 to £7 10s. per 100.

A very fine lot of Extra Strong Trees. These will come into bearing very quickly. Price 3s. 6d. each.

Alpha.—This is one of the earliest known sorts. Fruit medium to large, yellow with a red cheek, flavour rich and sugary. The tree is a vigorous grower and very hardy. Ripens November.

Armour's Alpha—Supposed to be an improvement on the above, larger and regular bearer.

Bush Peach.—Large yellow, slight red sunny side, flesh yellow, juicy, rich delicate flavour. Early December. Reliable cropper.

Colenbrander—Medium to large, rich yellow with red cheek, flesh very rich and sugary, early. Ripens November.

Early Cape.—This is propagated from selected trees of the well known Western Province variety, and it needs no recommendation, fetching, always being amongst the first in the market, a most excellent price. Ripens November.

Precose de Holland.—A reliable second early, large fruit, yellow, almost round. Succeeds in District where most others fail. Ripens December.

Ohenimuri Apple. Excellent keeper. One of the most Popular.

APRICOTS.—(Continued).

Riverside.—Fruit large to very large, roundish oval, of best quality; skin yellowish green with a red cheek where exposed, tree a strong grower, with shortjointed wood and large foliage; a sure bearer of fine fruit, ripening a fortnight before "Moorpark."

Royal.—It is one of the most widely popular apricots in Africa, being a steady and abundant bearer, and healthy and vigorous grower; the fruit yields a first-class canned or dried apricot.

St Ambrose.—Large, medium late (December). Oval shaped fruit. Skin deep yellow, red exposed side. Flesh firm, juicy, sugary, clings to stone. Kernel of stone very bitter. Regular heavy bearer.

Tilton.—Rather late, of good size, high colour, an excellent flavour, and has proved itself here a regular and heavy cropper. Excellent for canning and drying.

Victoria.—Large, highly coloured; flesh rich and juicy. One of the best. Ripens Dec.

Will's Early.—Strong grower and productive, earliest of all. Ripens 1st week December.

FIGS.

Best varieties at 1s. 6d. to 2s. 6d. each. £5 10s. to £7 10s. per 100.

Cape White.—The well known old Cape variety. Fruit small, roundish flat. Skin pale, green, flesh light yellowish brown. The best for jam, and quite suitable for drying. Flavour delicious.

Castle Kennedy —Fruit large and early; an excellent variety, sweet and well flavoured. Tree is hardy and vigorous.

Marquis Lorenzo.—Well known throughout South Africa. Tree a free grower, and regular heavy bearer, large.

Panhee —The "Tiger Fig." Fruit striped green and yellow, An enormous cropper.

Smyrna —Large, brown, rich flavour.

White Adriatic.—Fruit above medium, roundish. Skin very thin, greenish in shade, turning to greenish yellow when ripe.

White Genoa.—Fruit above medium, roundish; stalk short. Skin pale greenish brown. Flesh pale, red, sweet and highly flavoured. An excellent variety.

GUAVAS.

Healthy Trees. Established in Tins, 1s., 2s. and 3s each.

LOGANBERRY.

Strong growing hybrid bramble, bearing an abundance of edible fruit, 1s. 3d. each.

LOQUATS.

Trees in Tins, 1s. 9d. to 2s. 6d. each.

MULBERRIES.

2s. 6d. to 3s. each.

Perpetual, everbearing variety, very fine.

All Fruit Trees Packed FREE for Cash with Order.

NECTARINES.

Prices 1s. 6d., 2s. each. £5-10 to £7-10 per 100.

De Cousa.—Large size and high colour, one of the best for export.

Early Rivers —Fruit of largest size, skin rich crimson on side next sun, light yellow, marked with red on shaded side; flesh is tender, juicy and rich; very early.

Lord Napier.—Very good, large, beautiful, aromatic. January.

New Boy.—Largest size, very handsome, covered with brilliant crimson, good flavour, very late, ripening end of February.

Stanwick.—Fruit large, roundish, oval. Skin lively green where shaded, purple red where exposed to sun. Flesh white melting, rich, sugary, and most delicious. One of the most popular later varieties exported.

PEACHES.

Peaches are worked on Seedling Peach Stocks.

The Peach, like the Japanese Plum, will thrive and bear abundantly almost anywhere. Where the choicer varieties failed to fruit satisfactorily in the warmer districts of the Union the sub-tropical varieties have opened a new era in Peach culture. Where the tree crops heavily, the fruit should be thinned, particularly the sub-tropical.

Prices 1s. 6d. to 3s. 6d. each. £5 to £7-10 per 100.

A very fine lot of Extra Strong Trees. These will come into bearing very quickly, 3s. 6d. each.

Alton-White Flesh.—Firm, juicy, melting; earlier than Carman; bearing when others fail.

Amsden's June.—Highly coloured, good flavour; very early.

Armitage.—Sound, large, greenish yellow, carmine, very highly coloured. It is **the** peach in this class. Ripe early in November.

Alexander-Jewel.—The best Chinese Peach in the country. It has the enormous producing power of its Chinese parent as well as the hardiness and quick growth, while retaining its size and quality from the Early Alexander. Extremely early.

Baltet.—Large fruit, deep coloured, tree vigorous and prolific; probably the best of all late sorts.

Belle Beauce.—Large, deep red all over, flesh white, juicy and rich, red at stone; mid-season.

Blackburn.—A big improvement on Elberta, larger, earlier; colours well three weeks before ripening, thus can be picked quite hard; flavour excellent; good grower and heavy bearer.

Brandywine.—It is a very late yellow free-stone Peach, of large size, and good flavour.

Brigg's Red May.—A Californian Early. Size medium to large. White skin with red cheek. Flesh greenish-white, melting, juicy, firm and delicious. Good shipper. Stone partially free. A standard early.

Cape freestone.—This well known variety requires no description.

Cabler's Indian Blood.—A medium-sized purplish shaded clingstone, flesh reddish. A vigorous grower and most prolific. Mid-season.

Carman.—Large yellow skinned peach, with a rosy blush on the exposed side, flesh white, tender and melting. A splendid second early. Ripens end December.

Champion.—A new hardy early variety of greatest size, highest flavour, and best shipper of early peaches, perfect freestone. Colour beautiful creamy-white with a bright red cheek. Very handsome in appearance. Ripens end January.

Grow PERPETUAL RHUBARB for WINTER use.

PEACHES.—(Continued),

Crimson Galande—Fruit large, roundish. Skin almost entirely covered with dark crimson, nearly black. Flesh very tender and melting, very much stained with red at the stone from which it separates freely. A very excellent peach. Tree a free grower. Mid season. 1st week January.

Comet.—Very large, yellow flesh, a fine canning peach.

Constantia Beauty.—Colour yellowish green, red next the sun; flesh white, juicy, melting and delicious. An excellent export peach, ripe in January,

Constantia Early.—Of first-rate quality and appearance, suitable for export trade. January

Delicious.—A splendid mid-season kind; good bearer.

Duke of York.—A good highly-coloured freestone peach of fair size, and excellent flavour. Bears well. Highly recommended. December.

Dr. Hogg.—A delicious and well known English peach of great merit. Flesh yellowish white, melting rich, and delicious, red at the stone, from which it parts freely. January.

Early Alexander.—Fruit greenish-white nearly covered with red. Flesh firm, juicy, partially freestone. Ships well. A standard early.

Early Crawford.—Very large. Skin yellow with red cheek. Flesh yellow, rich and excellent. A perfect freestone. Mid-season.

Early Mignonne.—Large, highly coloured and flavoured; excellent.

Early Rivers.—An early English peach. Fruit large, roundish; skin pale yellow, blush on the sunny side. Flesh pale to the stone, tender, juicy, rich. Heavy bearer.

Early Silver.—Very large fruit, melting and rich. January.

Elberta.—Fruit large, yellow with red cheek, freestone. Flesh yellowish, highly flavoured and juicy. Free growing and healthy. January.

Florida Crawford.—Large roundish oblong; light yellow with red cheek. Flesh yellow, melting, juicy and rich flavour. Quality excellent. A heavy cropper. February.

Foster.—Very large, colour deep orange red on sunny side. Flesh yellow, very rich and juicy. Very good for drying, and good for market. Mid-season.

George's Late.—A very fine late peach, very upright in growth, hard and juicy. Yellow flushed. A heavy cropper.

General Lee Cling.—Medium to large, oblong, creamy white with crimson splashes, flesh whitish, melting and juicy; January.

Gladstone.—Fruit very large, roundish and depressed at crown. Skin pale, mottled red, red cheek. Very free grower. One of the best late peaches. Freestone.

Gold Dust.—A new yellow clingstone peach. Large, round, deep yellow, with a red cheek. Flesh very rich, yellow and juicy of unusually fine quality.

Greensboro'.—Yellow with blush streaks, large, of good quality; ripens a week earlier than "Alexander." December.

Hall's Yellow.—A yellow freestone Chinese peach, ripening at Christmas. An enormous cropper and an excellent early jam peach.

Hay's Cling.—Large fruit, dark red, flesh white, hardy, sure cropper; late.

Improved St Helena.—Yellow fleshed, very large, orange yellow; grand. February.

Ironclad.—The winner of the 1000 dollar prize on the San Francisco Exhibition. Your orchard is incomplete without this fine variety.

Jewel.—Medium to large, highly coloured on exposed parts, flesh melting, juicy and sweet, excellent quality, freestone. November.

Apricot Royal is par excellence for drying.

PEACHES.—(Continued.)

Killiecrankie.—Size large to very large; flesh cream, juicy, and of the finest quality, skin greenish overspread with crimson, red round the stone. Ripening first week in December and possessing the productiveness of Waldo.

Kia Ora.—A seedling from Alberta; identical in size but a much better cropper and harder tree.

Krummel October—Most profitable late yellow freestone, ripening two weeks later than Salway. Strong grower, extremely hardy; the fruit hangs very late, without decaying.

Large Golden.—Its size is enormous, good even shape, and in colour is beyond anything we have seen, being a splendid yellow and crimson coloured peach, good for canning or dessert; medium. A really first class peach in every way; freestone.

Lemon Cling.—Lemon shaped, lemon coloured fruit, of best quality, buttery. Mid-summer

Lady Palmerston.—Very large, flesh yellow, good for canning; late.

Louis Grognet—A seedling of "Alexis Lepere," vigorous and prolific; fruit large, beautiful; flesh white, fine, sugary; freestone; ripens after "Hale's Early" and before "Grosse Mignonne Precocé."

Mamie Ross.—Tree vigorous, upright grower, regular bearer, flesh white, semi-cling, of extra large size and good flavour. Suitable for export but valuable for local markets. Middle December.

Mayflower.—Very early variety, fruit large, of a superb carmine-red colour all over, of excellent quality; clingstone.

McKevitt's Cling—White; flesh firm, rich, sugary, and highly flavoured, white to the pit; excellent for shipping and canning.

Mountain Rose.—A large size hardy peach, of excellent quality, white, tinged all over with red; popular. February—March.

Muir.—This is the great Cape canning variety, for which purpose and for drying still remains unbeaten. A large delicious yellow freestone; a strong grower. Late.

Maoriland.—Fruit large, flesh light; sugary and fine flavour; freestone; late.

Newhall.—Yellow deep red cheek, excellent for shipping and drying.

Nicholl's Orange Cling.—A very large yellow peach; a good canning variety. It is a strong grower and heavy bearer.

Oklahoma Beauty.—Considered a great improvement on Oklahoma Queen. Specially recommended by the Government Experts.

Oklahoma Queen.—Large, greenish yellow, pink streaks sunny side, flesh white, green at stone, melting, juicy, freestone, ripe November 15th.

Pallas.—Medium to large oval, an excellent variety; ripening after Waldo. This variety was sold on the Johannesburg market, November 2nd, fetching record prices.

Peregrine.—An early mid-season variety. The fruits are large and handsome, with a brilliant crimson skin; the flesh rich, highly flavoured, and parting readily from the stone. Excellent for export.

Red Bird Cling.—The first extra early good shipping peach, creamy white overspread with bright glowing red. Tree hardy, holds its foliage late.

Red-Leaved.—This peach is remarkable for the colour of its foliage—in spring being bright purple, changing to deep bronze, fruit fine flavour, clingstone, valuable both for shrubbery and orchard.

Royal George—Fruit large round. Skin very pale, speckled with red in the shade, marbled with deeper red on the sunny side. Flesh pale yellow white, red at the stone, very juicy rich, delicious, and highly flavoured. Cling. January 3rd.

Apricot Royal is par excellence for drying,

PEACHES.—(Continued.)

Salway.—Fruit large, roundish; skin yellow, rich crimson cheek. Flesh deep yellow, red at the stone. Adapted for both market and drying. Very late.

Schoongezicht.—Mr. Merriman's selected export peach, an old Cape melting variety of delicious flavour, good size and high colour; a good and regular bearer, and very much esteemed in London.

Seller's Golden Cling.—The most highly esteemed yellow cling grown in the Cape Province. Considered a heavier bearer than Orange Cling. February 7th.

Shackelford.—Chinese type, very early, large, globular fruit of good appearance. Flesh white, juicy and sweet, excellent for market.

Sanquine or Blood.—Latest of all, medium size, very firm, fine grained, well perfumed. Will travel any distance and stand a rough journey. Skin deep purple, flesh blood-red and creamish yellow.

Victor (Le Vainqueur).—Large creamy white, with blush cheek; flesh tender, juicy, melting and delicious; freestone. The earliest known peach, ripening three weeks before the Alexander; large fruit of the best quality. November.

Waldo.—Medium, elongated, bright yellowish-red, washed with carmine, juicy and sweet; a prolific sort, requires thinning. November and December.

Waterloo.—Fruit about medium size, roundish, skin with bright red cheek, mottled, darker red side next sun. Flesh pale, with greenish tinge where shaded. Adhering slightly to stone. Melting, juicy, and rich flavoured; very early; ripens same time as Early Alexander.

White Parvie.—Well known old Cape variety, good for canning.

Wiggins.—An early freestone of large size and most highly coloured. Tree very hardy and prolific bearer; flesh very rich and juicy. Its large size, striking colour, as well as its season, secures for it the highest prices in the early markets; a fine companion to Waterloo. 1st Week December.

PLUMS, Japanese Type.

Prices 1s. 6d. to 3s. 6d. each. £5-10 to £7-10 per 100.

A very fine lot of Extra Strong Trees. These will come into bearing very quickly. Price 3s. 6d.

The Japanese Plums and their hybrids have largely superseded the European type in South Africa, their hardiness, vigorous growth, early bearing (generally second year from planting), and productiveness, should commend them to all fruit growers wishing a quick return. For our warmer districts, where the ordinary type will not thrive, they fill the gap as a canning or other preserving fruit they have no equal.

Abundance, or Yellowish Flesh Botan.—Medium to large, heartshaped, skin yellow, reddish on sunny side, very rich, slight apricot flavour; one of the best early varieties for cold districts.

Akorana.—A new early seedling from Abundance. It is a very vigorous grower, more spreading than its parent. The fruit is of largest size, and exceptional quality, and ripens with Mirabella in November.

Burbank.—A very excellent variety, and highly popular. Fruit nearly round, and clear cherry red, with a lilac bloom. Flesh deep yellow, very sweet, with a peculiar and most agreeable flavour. Tree vigorous and an enormous cropper.

PERPETUAL RHUBARB succeeds where other varieties fail.

PLUMS.—(Continued.)

- Chalcot.**—One of Burbank's varieties. In every respect a delicious plum. Large size roundish and flat, colour beautiful.
- Federation.**—A cross between Burbank and Wickson. Fruit, size, shape and colour resembles Wickson. Quite as productive as Burbank.
- First.**—As the name implies this is an extremely early plum, large transparent, yellow fruit with firm, sweet and juicy flesh.
- Hale.**—Medium, round orange, overspread with red; sweet, with a peachy flavour; enormous cropper. One of the best market sorts. December and early January.
- Golden Heart.**—Large, golden yellow, flesh solid and meaty; sweet, and free from bitterness at pit.
- Kelsey.**—Very large, heart shaped; colour greenish yellow overspread with a reddish purple, with blue bloom; flesh solid, rich and juicy. A very prolific early bearer. Ripens January—February.
- Methley.**—Fruit medium sized, almost globular; colour rich dark red, with purple bloom, mottled. Flesh pink, fine texture, melting and delicious; ripens very early, first week in December, and continues throughout that month, bearing heavily.
- October Purple.**—Large, deep purple, heart shaped, flesh yellow, juicy, firm and of good flavour. A free bearer, ripening late. February.
- Omaha.**—An immense coral-red plum, flesh rich yellow, firm, juicy.
- Royal or Climax.**—Tree a vigorous grower and very productive. Fruit large, heart shaped, highly coloured; flesh yellow, delicious. Ripens very early and for this reason should command the attention of planters; a really superb plum. December.
- Red Nagat.**—Skin purplish red, flesh solid, juicy and sweet. Very firm, an excellent market plum. Ripe early in February.
- Santa Rosa.**—Medium to large, purplish crimson, with purple bloom faintly spotted white; slightly oblong, flesh yellowish red, juicy, firm and delicious. Ripening December 20, and will keep ten days after picking. A strong grower, a regular and abundant bearer. Strongly recommended as a commercial variety.
- Satsuma or Blood Plum.**—Large to very large, skin purplish red, flesh entirely red or blood colour to the stone, well flavoured and very firm; as a combined market, dessert, and cooking fruit it has no equal. January.
- Shiro.**—Fruit medium to large, colour light yellow, flesh firm and juicy, good carrier.
- Sultan.**—A strong free grower and regular and heavy bearer. It is of the Satsuma or Blood type. Fruit of large size and slightly elongated in shape.
- Ura Bena.**—Round yellow fruit; best quality. Good cropper.
- Wickson.**—One of the Burbank's productions, a strong upright grower and heavy, but regular bearer. Ripens about mid-season. Fruit of the largest size, heartshaped; colour a whitish-green, but colours up a rich red when ripe; can be picked green, and will take full colour. Keeps two weeks or more. Very popular in Africa.
- Wright's Early.**—The earliest of the Japanese Plums; fruit very similar to Burbank; an enormous cropper.

PRUNES.

Prices 1s. 6d. to 2s. each. £5 10s. to £7 10s. per 100.

California d'Agén.—This is the genuine French prune of commerce.

Apricot Royal is par excellence for drying.

RASPBERRIES.

Red and White Assorted.—9d. each, 6s. dozen, 40s. 100.

Raspberries prefer a deep loamy soils, but will succeed in almost any garden soil. The canes in the first year of planting should be cut down to within a foot of the ground. As the fruiting roots of Raspberries are near the surface, the ground should be disturbed as little as possible, except with the hoe.

WALNUTS.

Prices 1s. 6d. to 2s. 6d.

VINES (Grape.)

Prices 1s. each, 10s. 6d. dozen.

Barbarosso.—Black round berry, tough hard skin. Late, good carrier; suitable for export.

Crystal.—A white round grape; midseason. Good flavour and popular. Succeeds well in nearly all parts of the country.

Gros. Colman.—Bunches of berries very large; the most handsome black grape grown.

Hanepoot, Red.—A similar grape to the white variety. Not so popular, however.

Hanepoot, White.—An oval white Muscat grape. Very late. Superior flavour. Very popular everywhere.

Hermitage.—Medium size to large oval black berry. Good flavour. Carries well and is suitable for export.

Muscat Hambro—Rather delicate, but first class grape. Good.

Raisin Blanc.—Large late white grape. Good flavour and size. One of the most popular market varieties.

Red Muscadel.—Ripens very early; of considerable value as an early market variety.

Ornamental Plums, etc.

Prices 2s. to 3s. 6d.

Amygdalus Pollardii—A very pretty and pink-flowered almond.

Apricot Flowering.—Pink, large flowers.

Double pink, handsome tree for early flowering in July when flowers are scarce; most beautiful shade of pleasing pink, fruit edible.

Meseri flore pleno.—Another variety of P. Pissardi, with the same purple foliage; flowers rose, double, larger than those of the type; very effective.

Prunus Pissardi.—Foliage brilliant crimson, bearing good crops of edible fruit, size of cherry plums, ripening in December.

Double Flowering Peaches.

These are fine for all districts, the glorious flowers creating a mass of fine colour in early spring, just before the leaves come out. Should be well pruned into shape to get them at their best.

Pink Crimson.—Flowers very bright crimson.

White—Flowers pure white.

Magnifica.—Semi-double, very large, blood red.

Hermoine.—Double blossom, pink striped with carmine.

Grow PERPETUAL RHUBARB for WINTER use.

ROSES.

PRICES:--Customer's Selection 1s. 9d. each. 18s. dozen. 19s. 6d. per dozen, post free in the Union. £7 10s. per 100.

Our Selection 1s. 6d. each. 15s. per dozen. 16s. 6d. per dozen post free in the Union. £6 5s. per 100.

Established in tins 2s. 6d. each., 25s. 6d. dozen.

HINTS.

Tread the soil firmly down around each plant, stake carefully, and give a good watering. Mulch with well decayed manure, and shade with grass until growth starts.

All rose trees are dispatched ready pruned for planting.

Particular care should be taken to entirely remove any suckers or shoots coming up from the stock. Newly planted Roses should especially be watched the first year after planting, for shoots coming up from the roots below where the plant has been budded.

Planting season from May to September, also December and January. Abbreviations : T., Tea Scented ; H.T., Hybrid Tea ; H.P., Hybrids or Spring blooms.

How to select.—Unless you have actually seen the Rose in bloom, catalogues do not fully describe them, therefore it is much better to state, colour, growth, etc., and leave the selection to us. You will generally get a better selection as we have the experience to work on.

ROSES TRUE TO NAME.

Many Hybrid Tea and Tea Roses do not come true to colour in early Spring, or on very hot days; yellow roses will often come white, and reds turn out pink, so a rose should not be condemned on the first flowering.

Several other varieties can be supplied. A list of varieties will be sent on application.

Adam, T—Very free blooming and lasting; rosy pink; very good, especially in early spring

Admiration—Colour a remarkable blending, heavily washed and shaded vermilion, sweetly scented. A fine bedding rose, for massing or cutting.

Aline Sisley, T.—Violet red, medium sized flower.

Antoine Rivoire, H.T.—Flowers large and full with stiff petals, colour rosy flesh.

Ard's Rover, H.P.—Very deep maroon, strong climbing growth.

A. R. Goodwin, P.—Coppery orange red, passing to salmon pink, as the flower expands; flowers large, full of fine form, beautiful, healthy growth, vigorous and fine branching.

Banksian Fortunei.—Large white; rampant climber.

Banksia. Yellow.—Small yellow flower in clusters, fragrant, thornless

Bardou Job, B.—Large semi-double flowers, bright crimson; first to bloom in spring. A grand garden rose.

Beatrice, H.T.—Deep rich pink, outer petals very pale flesh; petals of great depth and beautifully reflexed; vigorous, fine.

Beauty of Glazenwood, T.—Strong climbing growth, very profuse bloomer, coppery yellow, beautiful.

Bessie Brown, H. T.—Creamy white, flowers of much substance, petals smooth and shell shaped.

Betty Berkeley, T.—Bright red shading to crimson scarlet, medium size, full and well formed, buds very long; robust.

ONE DOZEN ROSES my selection 16/6 dozen, Post Free.

- Betty Uprichard**, H.T. — Inner face of petal soft carmine pink, with outside of petals glowing carmine, with coppery sheen and a suffusion of orange, flowers medium sized, not too full and freely and continuously produced
- Bliss**, H.T. — Flesh pink, very large and full, A very free bloomer and vigorous.
- British Queen**, H.T. — On well cultivated plants the blooms are a model of perfection. Frequently in the bud stage it shows a slight flush, which disappears as the bloom opens to purest whiteness; free grower, of branching habit; sweetly scented. Gold Medal.
- Buff Marechal Niel**, N. — Handsome yellow, tipped peach in bud form, opening with buff centre large and very full, habit and growth similar to Marechal Niel, a grand acquisition.
- Captain Hayward**, H.P. — Bright carmine-crimson, excellent.
- Caroline Testout**, H.T. — Light salmon pink, free flowering and fragrant.
- Carine**, H.T. — Coppery salmon shaded orange; long elegant buds on rigid stems.
- Catherine Mermet**, T. — Flesh rose colour blooms of fine form, large and double.
- Celine Forestier**, N. — Climber, bright sulphur yellow, outer petals paler, bud tinted pink before opening; fine.
- Christine de Noue**, H.T. — Bright red rose, large and full
- Charles K. Douglas**, H.T. — Vigorous upright growth. Flowers large, full, and fine form with long pointed buds; colour intense flaming scarlet, flushed bright velvety crimson. One of the finest bedding roses in existence; very sweetly scented.
- Charles Darwin**, H.P. — Dark velvety crimson of fine form and substance. Handsome.
- Chateau de Clos Vougeot**, H.T. — Velvety scarlet, shaded fiery red and blackish maroon, large and full.
- Chrissie Mackellar**, H.T. — Colour ochre yellow and orange pink, vigorous growth, and floriferous.
- Cheshunt Hybrid**, H.T. — Cherry red, large full, free flowering. Climbs well.
- Climbing Caroline Testout** — Satin rose with brighter centre; a reliable climber, adapted for pillars.
- Clb. Capt. Christy**, — Flesh, deeper centre.
- Climbing Devoniensis**, T — A vigorous sport from "Devoniensis."
- Climbing Frau Karl Druschki**, — Pure snow-white; a very strong grower.
- Climbing Lady Hillingdon**, — A vigorous climbing sport from this now popular variety; a valuable acquisition.
- Climbing Maman Cochet**, — A climbing variety of "Maman Cochet."
- Climbing Madame Abel Chatenay**, H.T. — Climbing vigorous sport from this superb garden rose.
- Cl. Madame Edouard Herriott**, H.T. — Deep terra-cotta, medium size, free, full and well formed, vigorous climber.
- Climbing Richmond**, H.T. — Pure brilliant red scarlet.

The Queen Alexandria Rose, H.T.—Intense vermilion colour, deeply shaded old gold on reverse of petals which spring from a pure orange base. Growth uniform and branching.

Triomphe de Luxembourg, T.—Perpetual flowering light pink.

Triumph, H.T.—Large and full; dark carmine with velvety crimson, fragrant and free flowering. Very good.

Ulrich Brunner, H.P.—Large bright, cherry red, floriferous.

Vanity, T.—Canary yellow, buds long, and elegant.

Victory, H.T.—Glowing scarlet crimson; long and pointed, faultless shape, free and fragrant. Gold Medal N.R.S

Viscountess Folkestone, H.T.—Creamy pink, large and full, very fragrant. Excellent.

Vicomte Maurice Mellon, H.T.—Colour apricot and yellowish salmon with coppery reflexes, washed with peach blossom, large, full and free, sweetly scented.

Waltham Climbers, H.T.—Nos. 2 and 3. They are all red Roses, but of distinct shades and colour. No. 3 the darkest, No. 2 is one of the sweetest roses in existence.

Warrior, H.T.—Blood-red, long bud, not quite full; long erect stems; profuse bloomer; very showy garden rose.

Wasily Chudloff, N.—Very strong climbing rose, colour rosy pink.

W. C. Gaunt.—Guard petals brilliant vermillion, tipped scarlet, intensified by deep crimson maroon reverse.

White Maman Cochet, T.—A sport from "Maman Cochet," white, edged pink in bud. No description can possibly convey even in a moderate way the beauty and charm of this truly wonderful rose, which, when known, will be grown in every rose garden.

White Killarney, H.T.—A pure white sport from the fine pink "Killarney."

White la France, H.T.—Full high centre, very pale flush; beautiful.

White Perle, T.—Nearly white, very free bloomer, handsome bud; vigorous,

William Allan Richardson, N.—Deep orange yellow edged with white.

William Shean, H.T.—Purest pink, beautiful bud, well shaped, of immense size; perfect form.

Willowmere, H.T.—Rich shrimp pink flowers, large, on erect stems, of robust growth; good.

W. R. Smith, T.—Creamy white flushed bright rosy pink.

Xavier Olibo, H.P.—Velvety black, shaded amaranth; very good,

Yvonne Vacherot, H.T.—Porcelain white, suffused pink, large, good shape, free bloomer.

Yellow Frau Carl Druschski, H.T.—Strong vigorous upright growth with strong thorns, large bud on erect stout stems, flowers opening large nankeen yellow.

Zephyrine Drouhin, H.B.—Bright, silvery pink; thornless pillar or hedge rose with Damask fragrance.

Special Notice : ORDER YOUR ROSE TREES EARLY.

Miscellaneous Seedlings, Plants, etc.

Artichokes.—3d. lb., 16s 6d. bag. Make excellent pig food. Available from May to September,

FLOWERING PLANTS.

Finest selection of varieties suitable for present planting, 6/6 per 100, Post Free.

Delphiniums, Chabaud Carnations.—Everblooming, Penstemons, Verbena, and many others at the correct season. All raised from the choicest imported seeds. 3/3 for 50, Post Free within the Union

Perpetual Tree Carnations.—Delphiniums, Kelway's celebrated new Hybrids. 3/6 per dozen.

BLACK CURRANT.

The English Black Currant is successful in many parts of South Africa, splendid flavour, large berries. Bushes 1/- each.

ENGLISH GOOSBERRY.

Strong bushes 1/- each.

PRIVET.

Privet Roots.—10/- per 100. Golden variegated Privet makes the most Ornamental and Serviceable Hedge Grown. 6d. to 3/6 each.

POPLAR.

Poplar.—In variety. 3/6 per 100 cuttings. Roots, 10/- to 25/- per 100, according to size.

RHUBARB.

Specialty, PERPETUAL RHUBARB.

Ordinary Rhubarb fails in many districts.

Long experiments have resulted in the Perpetual Rhubarb which grows where other varieties fail. The stalks are long and thick, flavour excellent, producing fruit all the year round.

It is in its prime during the winter months when other fruits for culinary purposes are unavailable.

Seed 2/- per oz., 20/- lb., 1/- packet. **Roots** 1/- to 1/3 each, 9/- to 12/- dozen, according to size.

CHAMPAGNE.—Very rich flavour but smaller than Victoria. 1/6 and 2/6 per root.

VICTORIA.—A good standard, large sort. 1/6 and 2/6 per root.

MYERS' GIANT—Producing stalks 2 inches in diameter and five to six feet long, delicious flavour. 1/6 and 2/6 per root.

HERBS.—Mint, Sage, Thyme, Marjoram, Lavender. 2/3 dozen

ONION PLANTS.—All the best varieties at 1/6 per 100, 7/6 per 1000.

POMEGRANITE.—30/- per 100.

KUKUYI GRASS ROOTS.—5/- bag.

RAFFIA GRASS.—Tying material. 2/6 lb.

SPINELESS CACTUS.—5/- 100 leaves.

STRAWBERRIES—Choice, strong, first and second runner plants will be ready for Autumn planting, Spring planting. We have plenty of first-class varieties to offer. Strong plants 9d. per doz., 5/- per 100.

OSIER WILLOW.—The true variety for making baskets, grow a few acres for tying up your forage, wheat etc. 10/6 per dozen. Cuttings, 12/6 per 100.

VIOLETS.—The largest and finest single blue in cultivation; flowers borne on extra long stems. 50 for 3/3. Post Free for cash.

Garden Pests—Give them SOX.

SOX.

Non Poisonous.

Free from Nicotine.

Safe to Use Anywhere.

Kills Caterpillars, Greenfly, Blackfly, Aphides, Blight, Mildew, and other troublesome insect pests on **Fruit, Flowers and Vegetables.**

ONE Tablet makes ONE GALLON of Insectide.

6 TABLETS 2/6.

Order your Fruit Trees early to save disappointment.

New Vegetable Seeds.

Hints on Raising Seeds.

The raising of flowers and vegetables from Seeds in South Africa, presents considerable difficulty to those who have not studied the problem, but it is quite easy when once the undermentioned principles have been grasped:

KEEP SEEDS MOIST—It is imperative to remember that seeds must never be allowed to become dry once they have been sown. It is impossible in practice to keep seeds moist if they are exposed to the fierce sun.

SHADING IS THEREFORE NECESSARY.—In any case seeds germinate better in shade. An excellent way to keep seeds in the open moist, is to cover the beds over with grass or manure, branches are also very good, the leaves falling off make a good mulch, then the branches can be removed. The all important value of surface mulching is not properly understood in South Africa, but it is an absolute invaluable aid, frequent dressings of decayed manure of half to two inches will give much better results than so much watering.

The constant light waterings on the surface only are positively injurious, when watering plants, seedlings, or seed, go over and over the ground until it is thoroughly saturated. A light spraying of the foliage of plants recently transplanted, morning and evening in hot weather is just ideal for making them grow.

The secret of success, to which we attach the greatest possible importance in a dry climate, is that unless a thorough soaking is given when watering it is better to leave it altogether.

Hay will be found to be the best shade for seedlings when transplanted. It is well to remember that in dealing with seedlings of double flowers such as stocks, carnations etc., the weaklings will be most likely to be the double ones.

Cultivation is the greatest aid to success, the plants just love it, and the weeds cannot live to take the moisture from the plants. It keeps the soil porous, keeps the moisture in, and lets the rain in. The more you cultivate, the less water the land will require; there is nothing like cultivation.

If you have not tried hay before, do so now, and you will be surprised to find how it simplifies matters.

Our seeds are the very best obtainable from the firms, with the highest reputations, who specialise in particular lines.

BEANS—Dwarf.

Giant Green Stringless.—Finest flavour, always entirely stringless. 1s pkt., 2s. lb.

Canadian Wonder.—The most popular variety 9d. lb. 10 lbs for 5s.

Yellow-Podded Wax or Butter Bean.—The finest Wax or Butter Bean in cultivation, of a rich golden yellow, and finest flavour. The seed is black. 1s. pkt., 2s. lb.

BEANS—Runner.

Scarlet Runner.—Of strong, quick growth. 1s. pkt.

BROAD BEANS.

Long Pod, Conqueror, Sharpe's—The longest and best of all Longpods. 1s. pkt., 1/9 lb.

Longpod, Bunyard's Exhibition.—Extra long pods. 1s. pkt., 1s. 9d. lb.

The Best Windsor Bean, Johnson's "Monster."—1s. pkt., 1s. 9d. lb.

All Seeds Post Free.

BEET.

Crosby's Egyptian.—Quite distinct from ordinary Egyptian. 6d. pkt., 5s. 6d. lb.

Early Crimson Globe.—Good shape, medium size, short top. 6d. pkt., 5s. 6d. lb.

CABBAGES.

Cape Spitz Kool (Krul Blaar).—For winter growing. 6d. pkt.

Offenham Selected.—Very fine second-early. 6d. pkt., 1s. oz., 9s. 6d. lb.

DRUMHEAD VARIETIES.

Autumn King or World Beater.—Produces heads of enormous size. 6d. pkt., 1s. oz., 10s. lb.

Brunswick Drumhead—Short stemmed, early. 1s. oz., 9s. 6d. lb., 6d. pkt.

Johnson's Giant Drumhead Cabbage.—Large solid hearts of the finest quality, 6d. pkt. 1s. oz., 9s. 6d. lb.

The "Red Cabbages"—They are excellent for pickling, 6d. pkt., 1s. oz.

Best of All, Sutton's (Savoy)—Earlier and better quality than Drumhead, 6d. pkt. 1s. oz.

CARROT.

Chantenay or Model.—Very choice strain. 6d. pkt., 9d. oz., 6s. lb.

Danver's Half-Long Scarlet.—Pale, semi-stump rooted, short topped. 6d. pkt., 9d. oz., 6s. lb.

Early Market.—The best of all carrots. 6d. pkt., 9d. oz., 6s. lb.

Nantes Early Stump Rooted.—Early, very little core, beautiful quality. 6d. pkt., 9d. oz., 5s. lb.

Oxheart or Guerande.—First to mature for table and market. 6d. pkt., 9d. oz., 6s. lb.

CAULIFLOWER.

SPECIALLY SELECTED TESTED SEED.

Autumn Mammoth (Sutton's)—One of the best for general use. 6d. pkt., 2s. oz.

Autumn Giant (Veitch's).—Large, vigorous kind. 6d. pkt., 2s. oz.

Eclipse Early.—Long stemmed variety, 10 days earlier than Autumn Giant. 6d. pkt. 2s. oz.

Kelway's Best of All.—The best variety for general use. 6d. pkt. 2s. oz., 24s. lb.

Reliance.—One of the hardiest easiest grown kinds. 6d. pkt., 2s. oz.

Veitch's Early Autumn Giant.—Succeeds Eclipse. 6d. pkt., 2s. 6d. oz.

CUCUMBER.

Cool and Crisp.—Vines of vigorous growth and very productive; 6d. pkt., 1/3 oz., 12/6 lb.

Grecian or Long Smooth Athens.—Solid, crisp, and delicious flavour. 6d. pkt., 1/3 oz. 12/6 lb.

Long Prickly—Hardy and heavy cropper. 6d. pkt., 1/- oz., 12/6 lb.

Remember. Sow thinly, cover lightly, and keep moist.

CAPE GOOSBERRY

Is well known on account of the excellent reputation abroad as well as in South Africa, of the delicious jam that is made from this fruit. 6d. pkt. 1/9 oz.

EGG PLANT.

6d per Pkt.

HERBS.

Common Lavender.—9d. per pkt.

French Thyme.—6d per pkt.

Pot, Marjoram.—6d. per pkt.

Broad Leaf Sage.—6d. per pkt.

KOHL-RABI.

Combines the cabbage and turnip flavours. 6d. pkt., 1/- oz

LETTUCE.--Cabbage Varieties.

Big Boston.—Strictly cabbage heading; slightly pointed and hard. 6d. pkt., 1/- oz.

Iceberg.—Very hard heading and deliciously crisp. 6d. pkt, 1/- oz.

Unrivalled Summer—May be sown the whole season. 6d. pkt., 1/- oz., 10/6 lb.

Wonderful.—Plants of extra large growth, producing heads of immense size. 6d. pkt., 1/9 oz.

LETTUCE.--Cos Varieties.

Paris Green.—Dark green, large, solid, self-folding, early. 6d. pkt., 9d. oz.

Mammoth.—A summer variety of large size, good for exhibition. 6d. pkt., 9d oz.

ONION.

Ailsa Craig.—Very handsome and large. 6d. pkt., 2/ oz.

Brown Spanish (Australian Brown).—A sure cropper. 6d. pkt., 9d. oz., 10/6 lb.

Cape Yellow.—Well known Cape variety (Colonial Seed). 6d. pkt., 9d. oz., 10/6 lb.

Early White Queen.—This is the earliest onion grown. 6d. pkt, 1/- oz.

Silver King Giant.—Globular, mild flavour, and keeps well 6d. pkt., 1/- oz.

PARSLEY.

Lincoln Green.—This strain of Parsley is the finest that has ever come under our notice. 6d. pkt.

OUR WONDERFUL PEA.

The Victor.—The largest and best of all the very early marrow fat wrinkled varieties, none to surpass it in flavour, one of the first crosses producing this was the sugar pea. 1/- pkt., 3/- lb.

Stratagem.—One of the best of the large-podded sort. 1/- pkt., 1/6 lb.

THE BEST PUMPKINS.

Large Cheese.—Large round flattened fruit. An excellent keeper. 6d. pkt., 10/6 lb.

Genuine Mammoth.—Fruits grow to enormous size. bright yellow flesh. 6d. pkt., 10/6 lb.

RADISH.

Icicle.—A most transparent whiteness, long, and leaves are short. 6d. pkt., 9d. oz., 5/6 lb.

French Breakfast.—A medium size Radish, olive shaped and tender. 6d. pkt., 9d. oz., 5/6 lb.

The VICTOR PEA surpasses any other.

Summer White Strassburg or White Hospital.—Root pointed, white, 4-5 in. long and about 2 in. in diameter; flesh white, rather tender, and not too pungent. The roots may be pulled six weeks after sowing, being then about $\frac{2}{3}$ of their full size. They will continue to increase in size for a month longer without spoiling. 6d. pkt., 9d. oz., 5/6 lb.

Turnip mixed.—Red and white, Turnip shaded. 6d. pkt., 9d. oz.

RHUBARB.

Perpetual Variety.—This bears all the year round, is of an extra fine flavour, much thicker stalks than the ordinary Winter variety and no more trouble to cultivate. 6d. pkt., 2/- oz

SQUASH.

Golden or Red Hubbard (Improved).—This represents the most perfect type of this justly famous variety. The flesh is of a rich golden yellow colour, very fine grained, solid and sweet. 6d. pkt., 12/6 lb.

SPINACH.

Giant Lucullus (The Best).—This variety is grown for the mid-winter, rib of leaf is silvery white and very large. 6d. pkt., 1/ oz.

TOMATO.

Atlantic Prize.—Early, vigorous, and one of the best tomatoes for producing large crops. 6d. pkt., 1/3 oz., 15/6 lb

Alliance.—A sure seller for market gardeners. 6d. pkt., 1/3 oz., 16/- lb.

Beauty.—Fruit very large and deep bright colour, smooth skin and solid flesh. 6d. pkt.

Earliana.—In earliness this variety excels all others. 6d. pkt.

Hawkin's Australian Dwarf (New).—A highly prolific variety of dwarf spreading habit. The plant grows about 1 foot high, but it throws out strong branches from the centre and on these huge clusters of fruit are borne. A great "fill basket," strongly recommended for Market Growers. Early, of good quality fine red colour. 1s pkt.

Matchless.—For twenty-five years the best large-fruited Main Crop Tomato. 6d. pkt., 2/3 oz., 24/- lb.

Marvel of the Market.—Fruit round or slightly flattened, about 4 inches in diameter, quite smooth, bright scarlet, produced in numerous bunches. Flesh pink, Vigorous, bushy, disease resisting plant, of which the fruit keeps and travels well without splitting. Especially suited for market supply and export. 6d. pkt., 1/3 oz, 17/6 lb.

Ponderosa Scarlet.—Fruit of enormous size, often weighing $1\frac{1}{2}$ to $1\frac{3}{4}$ lbs each, smooth and solid of a bright scarlet colour. 6d. pkt., 2/3 oz.

'P-L-M.'—Early, vigorous, productive, disease resisting variety 6d. pkt., 2/- oz.

TURNIP.

All the Year Round—Green top, round, pale yellow-fleshed variety, quick grower and does well at any time of the year. 6d. pkt., 6/6 lb

Snowball.—Extra Early, perfectly round, pure white, very solid, sweet, fine grained and tender. 6d. pkt., 9d oz, 5/6 lb.

White Stone, or Six Weeks.—Round, white fleshed and white skinned, maincrop garden variety, hardy and good quality. 6d pkt., 1d. oz., 5/6 lb.

VEGETABLE MARROW.

Custard, Bush.—Fruit similar to the travelling variety, but sometimes deeper colour
6d. pkt., 1/- oz.

Long White, (Bush).—Very free cropping variety of good quality, best for general use.
6d. pkt., 6/6 lb.

New Hybrid Marrow (Rotherside Orange).—The most prolific and best flavoured variety yet raised. Instead of the rather insipid, watery flesh of the ordinary varieties, it is firmer in texture; and possesses a delicate and characteristic flavour that pleases all who have tried it. The fruits are globe shaped, slightly flattened at the ends, and when ripe take a deep golden colour. In addition, it ripens remarkably early, and it can claim to be a welcome addition to every garden. 1s. pkt.

MISCELLANEOUS SEEDS.

GRENADILLA.

“Perfecta” Passion Fruit.—The fruit of this wonderful variety is twice as large as the ordinary variety, *Edulis*. It is very productive, the contents of fruit are identical *Edulis*. It is of delicious flavour. It is undoubtedly one of the most valuable introductions made for many years. 1s. pkt.

Black Wattle.—Clean fresh seed, 10 lbs for 6s. POST FREE WITHIN UNION.

Garden Pest—Give them SOX.

Non-Poisonous. Free from Nicotine. Safe to use Anywhere

Kills Catterpillars, Greenfly, Blackfly, Aphides, Blight, Mildew, and other troublesome insect pests on **Fruit, Flowers and Vegetables.**

ONE Tablet makes ONE GALLON of Insecticide.

6 Tablets 2/6.

FLOWER SEEDS.

We wish to draw special attention to our Flower Seed Department. Our constant aim is to secure the very BEST Strains obtainable, and we spare no pains or expense with this object in view.

Specially selected strains which, on account of their extra quality or novelty we particularly recommend.

The following Special Stock are EXCEPTIONAL strains, which will stand FIRST in competition with any of the trade.

Hints on raising seeds, see commencement of Vegetable Seed Section.

Achillea.

Double White.—One of the best hardy white perennials in the list. Grows about 2 feet high, and from spring till frost is covered with heads of purest white double flowers, flowering first season if sown early. 6d. pkt.

Ageratum.

Ageratum.—An easily raised, quick-growing, and very free flowering plant from Mexico 3d. pkt.

ALLWOODII.

This new race of plants is of the simplest possible cultivation, and is readily increased by cuttings, pipings and layers.

The perfume of Allwoodii is unequalled by any member of the Dianthus family.

Allwoodii, is half Carnation and half Pink, being a hybrid between the Perpetual Flowering Carnation and the Hardy Garden Pink. 3/3 pkt.

Anchusa.

Capensis (Cape Forget-me-not).—Flowers are of a rich deep blue, the clusters resembling those of a large Forget-me-not. 3d. pkt.

Antirrhinum.

Snapdragon are quite one of the showiest, freest blooming and most useful plants in cultivation, and cannot be too highly recommended for garden cultivation. 3d. pkt.

Majus (large-flowered). Kelway's Choicest, very fine. - Finest named varieties in mixed packets, 6d.

Maximum.—A new strain of great vigour; very large bold flowers. 1/- pkt.

Arctotis.

Grandis ("Blue-eyed African Daisy.")—The daisy-like flowers measure two and a half inches across, and are silvery white, with a sky-blue eye, surrounded by a narrow zone 3d. pkt.

Aquilegia, or Columbine.

Long-Spurred Hybrids.—Extra choice. 6d. pkt.

All Seeds Post Free, Cash with Order.

Asters.

When well grown, nothing can excel the chaste loveliness and exquisite colour blendings of a nicely arranged bed of choice Asters, and certainly no plant can be more easily raised and grown to perfection.

Myer's Specially Selected.—1/3 and 2/6 pkt.

New Giant "Crego" Asters.—Absolutely one of the best. Handsome chrysanthemum-like flowers, sometimes 4 inches across. Long stems. Fine bushes, 1/- pkt.

Comet.—Late branching, mixed. 3d. pkt.

New Development.—This extra fine race of Asters is a re selection, being extremely large, full and well formed, with florets slightly twisted in appearance closely resembling Japanese Chrysanthemums. 1/- pkt.

Ostrich Feather.—Finest mixed; extra early; a great advance in Asters; long graceful petals. 6d. pkt.

Balsam.

Double Camelia Flowered.—Our strains is unrivalled for great variety and size of flowers. 3d. pkt.

Baberton Daisy. (Gerbera Jamesoni.)

Scarlet.—One of our showiest and most effective native hardy herbaceous perennials, growing in heavy clumps. The blossoms measure from 3 to 4 inches in diameter and are beautiful and last well when cut. 1/- pkt.

New Hybrids.—By artificial hybridization the scarlet "Transvaal Daisy" is produced in a great number of varieties, varying in colour from pure white through shades of yellow, red and salmon, orange, scarlet to violet red. 1/- pkt.

Campanula Canterbury Bells.

Dean's Hybrids.—Mixed, choice, double and single. Easily grown in any garden and give fine borders or beds. Very attractive, early in spring. 6d. pkt.

Calendula.

"The Scotch Mangold"—Free flowering plants of easiest culture, succeeding everywhere. The plants bloom continuously, bearing showy double flowers which are popular for cutting. 3d. pkt.

Canna.

Crozy's Cannas.—Are famous for their luxuriant, dwarf growth, and immense Gladiolous-like flowers of most brilliant colours; their profusion and continuity of bloom under all climes and conditions render them easily the most useful, showy and popular garden plants grown. 6d. pkt.

Candytuft,

Empress.—Long spikes, pure white, fine. The Candytuft affords a great mass of showy flowers for comparatively very little trouble. In beds or masses they give lovely effects and make beautiful edgings. 3d. pkt.

New Dwarf Hybrids.—Beautiful form and colours, and all of wonderful size. Cannot be beaten by any strain. 6d. pkt.

Cardinal Climber.

This new hybrid Cypress Vine is one of the most beautiful climbing annuals that we know of, and deserves to be grown in every garden. The foliage, of rich, glossy green is palmleaf-like, with lacinated or fringed edges which against the brilliant scarlet tubular flowers, 1 to 1½ inches across, contrast most vividly, is of rapid growth. The seeds should first be soaked for a few hours in warm water. 3d. pkt.

Carnation.

Chabaud.—The double giant Chabaud Carnations flower as easily as the Marguerite Carnations, about six months from the time of sowing. They are a very fine type of Carnations, 16 to 20 inches high, of a good habit, with strong stiff stems. 6d. pkt.

Perpetual Finest Mixed.—The beauty of growth, grace, dazzling colouring of the flowers rich in various hues, and wonderful fragrance, makes this collection extremely popular. The flowers are produced in great abundance on long wiry stems, and almost every plant produces double flowers. 1/- pkt.

Celosia.

Thompsoni Magnificia.—It is such a wonderful improvement on all former types of Celosia as to seem an entirely new and distinct plant. Mixed. 6d. pkt.

Centaurea Imperialis.

The plants grow three feet in height, with numerous large flowers borne on long stems, in shades of colour ranging through white lilac, rose-pink and purple. 3d. pkt.

Chrysanthemum.

Shasta Daisy.—An improved White Paris Daisy. As the large flowers come singly on a stiff slender stem nearly 3 feet in length, they are especially useful as cut flowers. 6d. pkt.

Novelty Double Shasta Daisy.

Double Shasta Daisy.—This fine semi-double and double Shasta Daisy was produced in California. The flowers come about 60 per cent. true. They are of enormous size and the many fine loose petals remind one of a Chrysanthemum. 1/6 pkt.

Cobaea Scandens.

Elegant—Rapid-growing climbers, attaining a height of 20 to 30 feet. 6d. pkt.

Coreopsis.

Tintoria, Mixed.—Very graceful and extremely free-flowering annual of fine habit. Delights in good, rich well worked ground and sunny position. 3d. pkt.

Grandiflora.—Produces in profuse and long-continued succession large bold golden yellow flowers during the summer months. 3d. pkt.

Cornflower.

(Cyanus minor) Deep Blue—Will do well in any soil, and is very hardy. 6d. pkt.

Cosmos.

A tall branching annual of easy cultivation, having delicate needle-shaped foliage. 3d. pkt.

Cosmos Kelwayana (New.)—This is a wonderful acquisition. The flowers are of very great size and great beauty, and charmingly crested. 1/- pkt.

The Klondyke.—A true golden yellow Cosmos; a rich type. 6d. pkt.

Cowslip.

Yellow.—A charming hardy perennial, splendid for beds and borders. 1/- pkt.

Delphinium

In variety and beauty of its tints, which are as numerous as they are charming, no other plant can equal the Delphinium. 3d. pkt.

Kelway's Choice New Hardy Hybrid.—Saved from celebrated named varieties, mixed, 6d. pkt.

Dianthus.

Plumarius (Pheasant Eye Pink.)—This is the original clove pink. Easily grown and very valuable. The exquisite flowers are borne in great profusion. 6d. pkt.

Dimorphotheca.

African Golden Daisy.—On account of its easy culture, free-blooming habit, and bright appearance, it is rapidly becoming a great favourite. 6d. pkt.

Digitalis.

Foxglove.—A very interesting family of old fashioned plants, whose culture is so simple as to bring them within the reach of all. 6d. pkt.

The Shirley.—Magnificent strain, enormous flowers from pure white to deepest pink. 1/- pkt.

Eschscholtzia.

Kelway's Hybrid Grandiflora Mixture.—New large flowering erect type containing a large percentage of new shades in Eschscholtzias, and includes soft pink, scarlet, chrome, copper red, claret, and royal purple mixed. 6d. pkt.

Freesia.

Refracta Alba.—They flower the first year from seed sown in autumn in tins or boxes. Seed germinates rather slowly. 6d. pkt.

New Hybrids.—This is one of the most remarkable novelties of recent years, producing delightful fragrant flowers in a large variety of colours, such as pink, rose, purple, blue, violet, orange, brown, etc. 1/- pkt.

For-get-me-not.

These charming little favourites succeed best in damp shady situations, but will thrive almost in any soil. 6d. pkt.

Gaillardia.

Grandiflora Superb Mixed.—A very free blossoming perennial bearing large yellow or red daisy shaped flowers all through the summer. Easy to grow. Fine for cutting. 3d. pkt.

Geum.

Mrs. Bradshaw.—One of the grandest Hardy Perennials ever introduced. The flowers are the brilliant scarlet of the Geranium, and are nearly double and two-and-a-half to three inches across. 6d. pkt.

Lady Stratheden.—Golden yellow, double. 1/- pkt.

Gladiolus.

New Hybrids.—An extra choice early flowering strain. Flowers of immense size and wonderful colours. Gladioli propagated by seeds always produce a large proportion of new and beautiful shades. 1/- pkt.

Gypsophila.

Grandiflora, Elegans.—Dwarf branching plant of quick growth and great freedom of bloom. 3d. pkt.

Rosea—It produces long, fine mist-like sprays of tiny pink flowers, that are one of the finest things in the world for cut flower work. 6d. pkt.

Double-Flowering Paniculata "Baby's Breath."—A new hardy perennial type bearing in profusion racemes of double white flowers, which last long in perfection; 50 per cent may be expected to come double. 6d. pkt.

Hollyhocks.

Charter's Double—The flowers are quite as beautiful and perfect as those of the Camellia they are massed complete around the spikes. Beyond doubt "Charter's Superb Double Hollyhock" is the finest strain in cultivation. 6d. pkt.

Hunnemannia.

Fumariaefolia—An erect growing beautiful biennial, about 2 feet high and quite bushy. Foliage fine—cut and feathery. Blossom cup-shaped, bright yellow, 6d. pkt.

Larkspur.

Hardy annual ; sow in spring and autumn. Very slow to germinate. 3d. pkt.

Linaria.

Maroccana, Fine Mixed.—12 inches, a charming, exuberantly flowering annual, cut flowers keep fresh in water for days. The plants are completely covered in blooms, almost hiding the foliage. 6d. pkt.

Linum (Flax.)

Grandiflora Rubrum.—A very showy hardy annual, producing a profusion of brilliant scarlet-crimson flowers ; height 1 foot. 3d. pkt.

Lepstosyne.

Stillmanii.—A charming and useful annual, blooming in six weeks after sowing ; flowers golden yellow, useful for cutting. 6d. pkt.

Lupinus.

Annual Varieties.—The popular and easy grown garden annuals. 3d. pkt.

Regal.—Polyphyllus, hybrid Harkness' new art shades. 1/- pkt.

Six Hills.—Finely scented, great range of colour. 1/- pkt.

Snow Queen.—Perennial Tree Lupin ; flowers of pure white ; free. 6d. pkt.

Mesembryanthemum.

A dwarf edging plant, well adapted for rockeries or old stumps of trees ; stands drought and heat well. Seed should be sown in September. 3d. pkt.

Mignonette.

Goliath.—One of the grandest Mignonettes ever introduced, remarkable for colour, size, fragrance, and profusion of bloom. The flower spikes are immense, measuring 6 to 8 inches long. 6d. pkt.

Mina.

Lobata.—Splendid annual garden climber of luxuriant growth ; 18 to 20 feet. Adapted for trellis, verandahs, arbors, etc. 6d. pkt.

Nasturtium.

Tall.—Nasturtiums are quite one of the most popular bedding plants, and we cannot recommend them too highly. 3d. pkt.

Chameleon.—This is the latest improvement in Nasturtiums. It is a dwarf form of the famous tall "Chameleon" described under climbers. 6d. pkt.

Nemesia.

Suttoni.—Charming annual, remarkable for its free-flowering character, long duration of bloom, and the astonishing diversity in the colour or shades of the flowers. Mixed colours. 6d. pkt.

Nigella.

"Love-in-a-Mist," Miss Jekyll.—A lovely variety, with corn-flower blue blossoms, splendid for cutting. 6d. pkt.

REMEMBER : Sow thinly, cover lightly, and keep moist.

Paeonias.

The favourite of to-day, as it was fifty years ago. Luxurious Foliage plant, with magnificent double incurved flowers of enormous size and rich colourings 1/- pkt.

Pansy.

Bugnot's Exhibition—An incomparable strain, producing many very beautiful and rare varieties. 1/- pkt.

Cassier's Giant Odier—Flowers of immense size, all of which are either three-spotted or five-spotted. 1/- pkt.

Kelway's Choicest—Saved from the finest and largest show and fancy varieties. The enormous flowers are of thick heavy texture. The colourings and markings are widely varied, some flowers being almost self coloured in the richest tints, others are boldly margined with white cream, golden yellow, or soft rose; while still others have silvery grounds heavily blotched at the base of each petal with a dark rich shade. 2/- pkt.

Myers' Collection Giant Exhibition. 1/6 pkt.

Giant Masterpiece Mixed—The truly giant sized flowers are of the most striking character; the petals have a rich velvety substance and being heavily ruffled give them the effect of a double flower. Colours are mainly dark rich shades, bordered, blotched or marked in ray-like veinings with contrasting colours. 1/- pkt.

Trimardeau or Giant—A very showy class of vigorous growth, flowers of enormous size, a grand bedding variety for masses. 3d. pkt.

Phacelia.

Campanularia—One of the most charming early annuals for border planting. 6d. pkt.

Pelargonium (Geranium.)

Zonal—The seed offered will produce excellent results, having been saved from the finest named varieties only. Mixed. 6d. pkt.

Penstemons.

Handsome herbaceous perennials, and deservedly rising in repute as bedding plants, their long tubular flowers being very ornamental. Sow autumn or spring in tins and transplant. 6d. pkt.

Petunia.

Half hardy perennial, beautiful and fragrant. Superb mixture. 6d. pkt.

Phlox.

Drummondii—Very showy bedding plants, which are a blaze of colour for some months and which require no attention. 6d. pkt.

Poppies.

Flanders—The common scarlet single English Poppy. 3d. pkt.

White Swan—The plants are about 18 inches; they grow in pretty bush form, crowned with double pure white flowers of enormous size, and beautifully fringed. 6d. pkt.

Mikado—The striped Japanese Poppy. 6d. pkt.

Shirley—Re-selected, beautiful shades, single-flowered. 3d. pkt.

Portulaca.

Brilliant garden annuals, 6 inches high, grow luxuriantly in warm, dry, sunny situations and bloom profusely from early summer to autumn. Double, mixed, 6d. pkt. Single, mixed 3d. pkt.

Grow PERPETUAL RHUBARB, 9/- to 12/- dozen roots.

SALPIGLOSIS.

New Emperor.—Choicest Mixed. 3d. pkt.

SALVIA (Flowering Sage.)

Fireball.—The bushy plants 20 inches high are covered with long broad flower spikes with a great number of flowers of the most fiery scarlet. 6d. pkt.

SCABIOUS.

Azure Fairy.—Lovely new colour, rich pale blue, fine large flowers. 6d. pkt.

SCHIZANTHUS.

Hybridus Grandiflorus.—New dwarf large flowering variety. The Poor Man's Orchid. 3d. pkt.

STATICE.

Bonduelli.—Golden yellow, 18 inches. 6d. pkt.

STOCKS.

Ten Week.—Double fine mixed. 3d. pkt.

Beauty of Nice —A very conspicuous and handsome new winter Stock of quick growth, plants of robust growth, two to three feet in height, very free flowering; flowers very large, fine double fragrant; extremely valuable for florists' work. Per pkt, 1/- & 2/-.

Princess Alice.—Very fine large flowered, white. 1/- pkt.

"Empire" Collection.—Beauty of Nice. 6 Colours, Light Blue, Old Rose, White, Carmine Red, Carmine Rose, Violet, for 1/3.

SUNFLOWER.

Cucumerifolus Hybrids —Containing 30 or more different types. 3d. pkt.

Excelsior.—New Hybrids. Superb strains of merit that are unsurpassed. Many colours and markings. A most desirable novelty. 6d. pkt.

SWEET PEAS

Myers' Specially Selected.—A very choice mixture, strongly recommended to those who do not wish to grow varieties separately, but still desire to have something very good. There is the widest range of colour, every shade being represented, the flowers are of good substance and, being produced on strong, stout stems, are greatly appreciated for cutting. 6d. pkt.

Early Flower Long Season Spencer.—No garden should be without this grand strain, which is a most valuable acquisition. Bloom four weeks earlier than the Late Spencers, and under congenial conditions flower continuously for 4 months, producing profusely immense waved flowers. "Fours" predominating on long stems. 1/- pkt.

VERBENA.

New Mammoth (Mixed.)—Unexcelled for size, beauty, and diversity of markings. Unsurpassed for richness of colour and profusion of bloom. 6d. pkt.

Royal Bouquet.—An erect flowering strain, various colours. 1/- pkt.

WALLFLOWER.

Superb.—A well-known plant with spikes of deliciously fragrant single flowers; combining many shades of yellow, brown, chocolate, and orange purple. 3d. pkt.

ZINNIAS.

Mammoth Mixed.—The blooms are of immense size when well grown, averaging from four to five-and-a-half inches in diameter, and often three to four inches in depth. 3d. pkt.

ZINNIAS.—(Continued.)

Curled and Crested.—The flowers of this superb variety are of perfect form, large, round full, and double; the petals twisted, curled and crested into the most fantastic forms, rendering them free from the stiffness, characteristic of Zinnias. A splendid mixture. 6d. pkt.

Robusta Achievement, New.—Double with quilled and fluted petals, colours varying in shade of rose, salmon and scarlet, 6d. pkt.

A WILD FLOWER GARDEN

May be had in any suitable out-of-the-way place—hedge row, fence corner, or back lot by broadcasting and raking in Special Mixed Flower Seeds for Wild Gardens. 6d. pkt.

ORNAMENTAL and TIMBER TREES.

In flat stock tins averaging 25 to a tin, 10/- per 100.

Pines.—Four in a half tin from 3d. to 6d. a tree. In single tins 7/6 to 15/- a dozen, according to size.

QUOTATIONS FOR LARGER QUANTITIES ON APPLICATION.

CYPRESSUS.

Arizonica.—Experience gained during the past seems to indicate this the best cypress, if not one of the best trees to plant in the Orange Free State, and similar cold and dry regions of the Union. Both *C. macrocarpa* and *C. Lusitanica* suffer in comparison with it.

Lusitanica.—A large fast growing tree, producing valuable softwood, but requires moist, cool climate. May be used for shelter or hedges in favourable localities.

Macrocarpa.—Perhaps the tree most commonly planted in the Union for hedges and windbreaks on account of its quick growth and good appearance.

EUCALYPTUS.

The Gums are to-day the most widely planted trees in South Africa.

Rostrata (Red Gum).—This is only recommended for thorn or sweet veld. Will make excellent trees on soils so shallow that Blue Gum will die, but this in turn fails on the moist mountain soil. Timber red, takes a beautiful polish; is often confused with "Jarrah."

Saligna.—This is undoubtedly the most successful and popular gum in the Midlands of Natal. It is as fast growing as the blue gum, with heavy green foliage; the timber is the great sleeper timber of New South Wales, but also even from young trees, cuts up into an excellent box wood.

Sideroxylon (The Red Ironbark.)—One of the best gums for dry, rocky, and shallow soils. Hardy against frost. Excellent timber.

Tereticornis (Forest Red Gum.)—A hardy tree largely planted. It produces good timber, but growth is inclined to be straggly.

PINES.

Halipensis.—Slower in growth than most of the other Pines, but more reliable than any other on a dry shallow-soiled thorn veld.

Insignis.—The most rapid growing Pine in South Africa. The timber is light, soft, works easily, and is very suitable for box making, and even for ceiling boards, etc.

Pinaster.—Not so rapid as *P. Insignis*, but more reliable. The timber is heavier than that of *P. Insignis*, coarser grained, and very resinous.

Order your Fruit Trees early to save disappointment.

BULBS.

AGAPANTHUS.

White, 1/- each, 10/6 doz. Blue, 1/- ea., 10/6 doz

AMARYLLIS.

A fine species of hardy, free-flowering bulbs, flowers about 9 inches to 12 inches across, 1/6 ea
